

SENRAYN / AI BUILDER
Shanghai / 2026

AI-NATIVE PRODUCT CREATION

Sun Chen

AI Product Builder / AI Full-Stack Developer

I turn emerging AI capabilities into clear, reliable products through product thinking, modern full-stack engineering, and intentional interface design.

GITHUB
github.com/senrayn

CORE TOOLKIT

AI SYSTEMS

LLMs / Prompt Engineering
AI Agents / OpenAI API

PRODUCT & DESIGN

Requirements / User Flows
Prototyping / Figma
AI Interaction Design

FRONTEND

React / Next.js
TypeScript / Tailwind CSS

BACKEND & TOOLS

Python / Node.js / REST APIs
Git / GitHub / VS Code

EDUCATION

Jiangsu Ocean University

B.Sc. in Information and Computing Science
(Embedded Systems Track)
JUNE 2026

CREDENTIAL

Computer Software Copyright

Shortest Path Graph Solver V1.0

BUILD METHOD

IDEA / SYSTEM / EXPERIENCE

Move from product intent to working software, then learn from the result.

SELECTED PROJECTS

01

AI Builder

AI CODING PLATFORM

Turns natural-language requests into working applications with iterative AI conversations, live preview, code editing, and deployment-ready export.

ROLE Product design / Frontend / AI interaction

STACK React / Next.js / TypeScript / OpenAI API

02

AI Growth OS

PERSONAL OPERATING SYSTEM

Connects goals, learning, knowledge, and reflection in an AI-assisted personal growth cycle with intelligent links and weekly review.

ROLE Product design / Frontend development

STACK Next.js / React / Tailwind CSS / AI

03

Shortest Path Graph Solver

ALGORITHMIC SOFTWARE

Transforms abstract pathfinding into an interactive learning tool with visual graph editing, multiple algorithms, and step-by-step results.

ROLE Algorithm design / Product implementation

STACK Graph Theory / Algorithms / Desktop

CURRENT FOCUS

AI Product

Turn model capability into focused user value.

Full Stack

Build interfaces, APIs, and reliable system flows.

Product Design

Make complex software calm and understandable.
